

Progress report

Rafkhat Yuvashev 200103036

Ulagat Nauryzbay 190103220

Eldar Sharapiyev 200103253

The first thing we did was to create a website template with registration, login and main page. After testing the functionality we added visuals to our site, came up with the theme and brand "Radar clothes".

Then we created a module (The Go) with a link to our repository, which creates a txt file with user data during registration.

Further, when authorizing on the site, from this file these data are checked.

Rafkhat Yuvashev 200103036 made a code which creates txt file on registration

Ulagat Nauryzbay 190103220 linked it with the authorization page

Eldar Sharapiyev 200103253 made a module main and linked it to the repository
